FOR IMMEDIATE RELEASE

ACTRESS ROBERTA PACINO REVEALS BEAUTY SECRET OF THEATRE STARS --
New Facial Creme With "Micelized" Multivitamins Causing A Sensation

CARLSBAD, CA -- Roberta Pacino, sister of film star Al Pacino, is risking the wrath of fellow Hollywood beauties by revealing the acting world's "Broadway Secret" to facial youth and beauty. At age 18 Roberta was backstage at a Broadway production and overheard two famous and beautiful actresses discussing how they added vitamins to their facial beauty creme in order to nourish their skin and keep it looking young and beautiful.

Pacino began doing the same thing herself and today she looks much younger than her real age of 37. She improved on the formula over the years and now uses a water base creme instead of oil because the vitamins are absorbed into the skin much more easily. She also uses "micelized" vitamin supplements that certain studies have shown to maximize nutrient intake. "Micelization" apparently renders fat-soluble nutrients water-soluble. She further improved the creme by adding only 100% natural vitamins A, D and E. The vitamin D is especially important because the skin needs vitamin D. Although obtained directly from sunshine, the sun can dry out the skin. The creme puts the vitamin D directly onto your face where it is absorbed into the skin.

After years of keeping this beauty secret to herself and sharing it only with friends in the acting community through word-of-mouth referrals, Roberta has decided to satisfy increasing demand for her formula in a new business venture. Roberta Pacino's Renourishing Creme with Micellin™ is available for \$39 from Roberta Pacino International, 2588-D El Camino Real, Suite 213, Dept____ Carlsbad, CA 92008. It is also sold through home party plans. A free business kit is available upon request.

In her book *Let's Eat Right to Keep Fit*, author Adelle Davis seems to advocate that a deficiency of vitamin B2/riboflavin can cause crinkled lips, wrinkles around the mouth and discoloration of the cheeks. Moreover, the skin of the nose, chin and forehead can take on an oily appearance from fatty deposits. According to Davis, a lack of vitamin B2 probably is the most widespread deficiency in America. (Chapter 12, page 90.) Pacino points out that her creme differs from any other as it is full of natural and "micelized" multivitamins, making it probably the healthiest facial beauty creme ever offered to the public. The formula also contains vitamins B2/riboflavin.

Does brother Al Pacino use Roberta's beauty creme on his face too? Roberta isn't telling, although she does say that it is very popular with many men who are in high-visibility careers such as show business, sales and marketing, or who work outdoors.
